

PRESCRIBED RATE LOAN WITH A TRUST

GENERAL OVERVIEW

- Typically, the Dad, Mom, children and grandchildren are included as beneficiaries of the Trust.
- Must realize any gains on transfer of assets with accrued gains to the Trust.
- Interest at prescribed rate (currently, 1%) must be paid by the Trust by January 30 each year.
- Income earned in the Trust can be distributed to lower income beneficiaries (including spouses and children and grandchildren of any age).
- Trust generally has a useful life of 21 years.

	Without Prescribed Rate Loan Planning	Prescribed Rate Loan to Family Trust
Investment Assets	\$300,000	\$300,00
Rate of Return	5%	5%
Investment income	\$15,000	\$15,000
Estimated Tax Payable	\$8,029.50	\$3,007.50
Yearly Tax Savings:		\$4,017.60*

- The Trust must pay \$3,000 in interest to Dad, who pays tax of \$1,605.90 on the \$3,000 in interest income. The Trust distributes the \$12,000 to lower-income beneficiaries, who pay tax of \$2,406 (the Trust gets a deduction for the interest paid to Dad), for a total tax bill of \$4,011.90 on the \$15,000 (as opposed to a total bill of \$8,029.50).
